**DETAILED ACTION**

***Election/Restrictions***

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-9, drawn to a method of purchasing an aircraft by multiple owners, classified in class 705, subclass 26.
- II. Claims 10-21, drawn to a method including effecting a lease to an entity operable to coordinate maintenance and operation of an aircraft, classified in class 705, subclass 500.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, the invention of Group I recites the manner in which funds are assembled, managed, and transferred in order to effect the purchase of an

Art Unit: 3625

aircraft; while the invention of Group II recites the manner in which the operation and maintenance of the thus purchased aircraft is managed. The inventions form a patentably distinct methods which contribute equally yet separately and distinctly to the overall method disclosed. See MPEP § 806.05(d).

Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II, restriction for examination purposes as indicated is proper.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
